

**RESET**

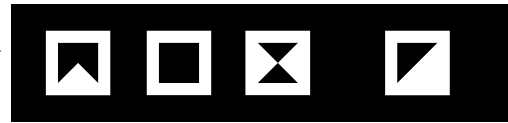

(Press 3 times and then hold to bring up interface?)

**BOTTOM SLIDERS  
MODE**

Slide the 12 equalizer  
band arms to move  
lights up and down that  
arm.

slider range

Handle changes color = to the position in the spectrum

**CRACKLE**

**TOGGLE  
ACCELEROMETER  
MODE**

Spectrum Range alpha

Spectrum Range beta

4 different "Mode" buttons

**CIRCULAR TAP AREA**  
(Uses range to color interior)

Tapping this area sets speed of cycle,  
which is animated in the center

Ideally holding the finger down on this  
area might stop the animation, and  
dragging the finger scrolls the current  
images around the lights

**Brightness Slider** (to get white and  
weird pastels, but always bright)

**Slider to generate variance with-  
out music playing** (sin based?, a  
dial that slides through wave form  
shapes? (e.g. envelope, sawtooth,  
square, etc.)

slider range

**PITCH SENSITIVITY SLIDERS**

Note: Sliding these boxes also  
adds value to silence,  
so this can animate without sound,  
equal to the tap BPM

Background on bottom displays  
the current spectrum from left  
to right
